Continuation of 3. NOTE: Applicant's amendment includes the new limitations "such that the leading parts of the portions of each signal overlap the trailing parts of the portions of the other signal", which require further considerations. Applicant should file an RCE for further considerations of the claims as amended.

Continuation of 11. does NOT place the application in condition for allowance because: Applicant argues that Gallagher does not teach the "portions having relatively low-amplitude leading and trailing parts". However, Gallagher does teach that as mentioned in the final office action. Further, the limitation "relatively low-amplitude leading and trailing parts" can be read on any signal, applicant did not specify what is the leading and trailing parts are being relatively low to; it does not have to be the same signal, it can be relatively low to any signal. It appears that applicant's argument goes beyond what is claimed. Therefore, the rejections are maintained.
